

ONT Parameter Review Packet

OPEN NAME TAGS
discussion draft

Prototype defaults for review before launch. These are tunable numbers around name validity, opening bond floors, auction timing, bid escalation, maturity, reauction, and destination records.

NAME RULES

Alphabet	a-z, 0-9
Length	1-32 chars
Case	lowercase canonical

Review alphabet, maximum length, and whether every valid length opens at launch.

BOND BREAKS

If moved early	name releases
Who can reopen	anyone
Cooldown	none

Review whether early bond breaks should release immediately, reset the floor, and allow instant rebids.

AUCTION TIMING

Base window	4,320 blocks
Soft close	144 blocks
Extension cap	none

Review ~30 day auctions, ~1 day response windows, and whether no hard cap is acceptable.

BID ESCALATION

Min raise	฿ 0.00001000
Normal raise	5%
Late raise	10%

Review whether late raises should escalate further to limit close-griefing.

WINNER BOND

Maturity	52,560 blocks
Before mature	successor bond
After mature	bond releasable

Review fixed ~1 year maturity versus length- or value-based maturity.

HIGHEST-VALUE REVIEW QUESTIONS

■ Are the shortest-name floors high enough without making ownership impossible?

■ Should the base auction window be shorter than about 30 days?

■ Is no hard cap acceptable if late bids must clear 10 percent?

■ Should maturity stay fixed at about 1 year or vary by length or final bond?

■ When a bond breaks early, should the next auction reset to the length floor?

■ Should destination records launch with a smaller constrained schema?

OPENING BOND FLOORS

Opening bid must clear the higher floor

Length floor	1-char	฿ 1.00000000	halves
Minimum floor		฿ 0.00050000	

Length	Floor
1	฿ 1.00000000
2	฿ 0.50000000
3	฿ 0.25000000
4	฿ 0.12500000
5	฿ 0.06250000
6	฿ 0.03125000
7	฿ 0.01562500
8	฿ 0.00781250
9	฿ 0.00390625
10	฿ 0.00195312
11	฿ 0.00097656
12-32	฿ 0.00050000

PROTOTYPE CONSTANT TO RESOLVE

The auction path currently uses a fixed 52,560 block winner-bond maturity period. Older helper code still supports an experimental epoch-halving maturity schedule. Before launch, ONT should choose one model and remove or clearly quarantine the other.
